PROFESSIONAL SUMMARY

Master's student in Artificial Intelligence at Florida Atlantic University with experience in AI applications, machine learning, multi agent systems, retrieval augmented generation, product prototyping, and data driven experimentation. Builds practical solutions with Python, SQL, PyTorch, scikit learn, LangChain, and vector databases, bridging applied research, engineering, and product thinking. Strong analytical profile, clear technical communication, and a track record of turning complex problems into usable solutions. Earned second place in the FAU Agentic AI Hackathon in 2025 and second place in the Three Minutes International Speech Competition in 2024.

EDUCATION

Florida Atlantic University — **Boca Raton, FL, USA**
Master of Science in Artificial Intelligence — *2024 to 2026*

Universidade Federal Fluminense — **Volta Redonda, RJ, Brazil**
Bachelor of Science in Mechanical Engineering — *2020 to 2022*

Universidade Federal Fluminense — **Volta Redonda, RJ, Brazil**
Bachelor of Science in Computational Physics, Not completed — *2017 to 2020*

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, HTML, LaTeX

AI and ML: Supervised and unsupervised learning, deep learning, LLMs, retrieval augmented generation, multi agent systems, natural language processing, model evaluation, prompt engineering

Libraries: PyTorch, scikit learn, pandas, numpy, matplotlib, LangChain

Data: Exploratory data analysis, data visualization, data preparation, metrics, experimentation, validation

Tools: Git, GitHub, vector databases, Ollama, Chroma, FAISS, rapid prototyping

Languages: Portuguese native, English fluent, Spanish intermediate

RELEVANT EXPERIENCE

NET, Neurodiverse Educational Testing
AI Engineer, Startup — *November 2025 to Present*

Developed the Web UI and integrated a multi agent architecture for AI assisted educational screening.

Implemented a guardrail based conversational agent for structured context collection, a retrieval augmented generation pipeline with semantic retrieval and knowledge matching for learning disorder screening, and a report generation agent that produces PDF recommendations and referral guidance for specialized evaluation.

Connected the interface, orchestration layer, and output flow into a functional prototype. The project earned second place at the FAU Agentic AI Hackathon in 2025.

SIEG IA
Creator and Manager, Artificial Intelligence media platform — *May 2025 to Present*

Built and scaled an AI focused media channel covering news and trends, reaching more than 100,000 followers and 100 million views in 2025.

Translates complex technical topics into accessible content, strengthening authority in AI, trend analysis, and market positioning.

SELECTED PROJECTS

Multi Agent RAG System for Neuroeducational Support ***Applied AI Project***

Designed a workflow combining a guardrail protected conversational agent, semantic retrieval with retrieval augmented generation, and automated PDF report generation to support educational and clinical referrals.

Worked on the integration of the Web interface, agent orchestration, and final user delivery.

Convolutional Chess Model ***Deep Learning Project***

Built a PyTorch model to process 13 channel board representations using convolutional and dense layers to learn tactical and positional chess patterns.

Applied deep learning to classification and decision support tasks in game scenarios.

LSTM Based Price Forecasting ***Machine Learning Project***

Developed a time series model for cryptocurrency price prediction, evaluating sequential modeling approaches and the potential use of technical indicators.

Agent for Tabular and Grid World Environments ***Reinforcement Learning Project***

Implemented reinforcement learning solutions, including Deep Q Networks, for sequential decision making environments using PyTorch for training and evaluation.

ADDITIONAL STRENGTHS

Product oriented mindset, strong ownership, fast learning ability, and effective communication across technical and non technical teams.

International academic experience in the United States and continuous work in advanced Artificial Intelligence topics.

LEADERSHIP AND ACTIVITIES

Project Lead, Rocket Launch Team at UFF.

Teaching Assistant for Fluid Mechanics at UFF.

Additional experience in student leadership, academic representation, and technical communication.

AWARDS AND RECOGNITION

Florida Atlantic University

Second Place, Agentic AI Hackathon *2025*

Awarded for NET, an AI based solution designed to support neurodiverse students and their families.

Second Place, Three Minutes International Speech Competition *2024*

Awarded for a speech on the impact of Artificial Intelligence on everyday life.
